Report Summary *for 22 pages*

 **0**
Total Errors

 **0**
Errors per page

 **59**
Total Alerts

 **2.68**
Alerts per page

Included Results

Documentation	Result Type	Category	# of Instances
	Blinking content	Errors	0
	Broken ARIA menu	Errors	0
	Broken ARIA reference	Errors	0
	Broken skip link	Errors	0
	Empty button	Errors	0
	Empty form label	Errors	0
	Empty heading	Errors	0
	Empty link	Errors	0
	Empty table header	Errors	0
	Image button missing alternative text	Errors	0
	Image map area missing alternative text	Errors	0
	Image map missing alternative text	Errors	0
	Invalid longdesc	Errors	0

Documentation	Result Type	Category	# of Instances
	Language missing or invalid	Errors	0
	Linked image missing alternative text	Errors	0
	Marquee	Errors	0
	Missing alternative text	Errors	0
	Missing form label	Errors	0
	Missing or uninformative page title	Errors	0
	Multiple form labels	Errors	0
	Page refreshes or redirects	Errors	0
	Spacer image missing alternative text	Errors	0
	Very low contrast	Contrast Errors	0
	Redundant title text	Alerts	22
	Redundant link	Alerts	18
	Missing first level heading	Alerts	10
	No heading structure	Alerts	3
	Skipped heading level	Alerts	3
	HTML5 video or audio	Alerts	2
	Link to PDF document	Alerts	1
	A nearby image has the same alternative text	Alerts	0
	Accesskey	Alerts	0

Documentation	Result Type	Category	# of Instances
	Audio/Video	Alerts	0
	Broken same-page link	Alerts	0
	Device dependent event handler	Alerts	0
	Fieldset missing legend	Alerts	0
	Flash	Alerts	0
	Image with title	Alerts	0
	Java applet	Alerts	0
	JavaScript jump menu	Alerts	0
	Justified text	Alerts	0
	Kaltura video	Alerts	0

Results Detailed

--

Redundant title text

What It Means

Title attribute text is the same as text or alternative text.

Why It Matters

The title attribute value is used to provide *advisory* information. It typically appears when the users hovers the mouse over an element. The advisory information presented should not be identical to or very similar to the element text or alternative text.

How To Fix It

In most cases the title attribute can be removed, otherwise modify it to provide advisory, but not redundant information. Note that the title text may or may not be read by a screen reader and is typically inaccessible to sighted keyboard users.

The Algorithm...In English

A title attribute value is identical to element text or image alternative text.

Redundant link

What It Means

Adjacent links go to the same URL.

Why It Matters

When adjacent links go to the same location (such as a linked product image and an adjacent linked product name that go to the same product page) this results in additional navigation and repetition for keyboard and screen reader users.

How To Fix It

If possible, combine the redundant links into one link and remove any redundant text or alternative text (for example, if a product image and product name are in the same link, the image can usually be given alt="").

The Algorithm...In English

Two adjacent links go to the same URL.

WCAG 2.2 Success Criteria:

[2.4.4 Link Purpose \(In Context\) \(Level A\)](#)

Missing first level heading

What It Means

A page does not have a first level heading.

Why It Matters

Headings facilitate page navigation for users of many assistive technologies. They also provide semantic and visual meaning and structure to the document. A first level heading (<h1>) should be present on nearly all pages. It should contain the most important heading on the page (generally the document title).

How To Fix It

If the page presents a main heading, place it within an <h1> element. Add other sub-headings as necessary.

The Algorithm...In English

A page does not have an <h1> element.

WCAG 2.2 Success Criteria:

[1.3.1 Info and Relationships \(Level A\)](#)

[2.4.6 Headings and Labels \(Level AA\)](#)

No heading structure

What It Means

The page has no headings.

Why It Matters

Headings (<h1>-<h6>) provide important document structure, outlines, and navigation functionality to assistive technology users.

How To Fix It

Provide a clear, consistent heading structure, generally one <h1> and sub-headings as appropriate. Except for very simple pages, most web pages should have a heading structure.

The Algorithm...In English

No <h1>-<h6> elements are present in the page.

WCAG 2.2 Success Criteria:

[1.3.1 Info and Relationships \(Level A\)](#)

[2.4.6 Headings and Labels \(Level AA\)](#)

Ludwig Obst

https://ludwig-obst.de/weihnachtsbestellliste/		

Skipped heading level

What It Means

A heading level is skipped.

Why It Matters

Headings provide document structure and facilitate keyboard navigation by users of assistive technology. These users may be confused or experience difficulty navigating when heading levels are skipped.

How To Fix It

Restructure the document headings to ensure that heading levels are not skipped.

The Algorithm...In English

A heading level is skipped (e.g., an <h1> is followed by an <h3>, with no intermediate <h2>). Note that an <h1> is not required to be the first heading within the document.

WCAG 2.2 Success Criteria:

[1.3.1 Info and Relationships \(Level A\)](#)

[2.4.1 Bypass Blocks \(Level A\)](#)

[2.4.6 Headings and Labels \(Level AA\)](#)

HTML5 video or audio

What It Means

A <video> or <audio> element is present.

Why It Matters

<video> defines video, such as a movie clip or other video streams. <audio> defines sound, such as music or other audio streams. Audio content must be presented in a text format to be fully accessible to users who are deaf and hard of hearing. Video content with audio must have synchronized captions and a transcript. Audio-only content must have a transcript.

How To Fix It

For video content with audio, ensure that synchronized captioning and a transcript is provided. For audio-only content, ensure that a transcript is provided.

The Algorithm...In English

A <video> or <audio> element is present. Note that WAVE does not analyze fall-back content within the <video> or <audio> element. This content should be accessible because it will be presented to the user if the video or audio content is not supported.

WCAG 2.2 Success Criteria:

[1.2.1 Prerecorded Audio-only and Video-only \(Level A\)](#)

[1.2.2 Captions \(Prerecorded\) \(Level A\)](#)

[1.2.3 Audio Description or Media Alternative \(Prerecorded\) \(Level A\)](#)

[1.2.5 Audio Description \(Prerecorded\) \(Level AA\)](#)

[1.4.2 Audio Control \(Level A\)](#)

[Link to PDF document](#)

What It Means

A link to a PDF document is present.

Why It Matters

Unless authored with accessibility in mind, PDF documents often have accessibility issues. Additionally, PDF documents are typically viewed using a separate application or plug-in, and can thus cause confusion and navigation difficulties.

How To Fix It

Ensure the PDF document is natively accessible. Additionally, inform the user that the link will open a PDF document. Because PDF documents may have limitations in accessibility (particularly for complex content) and require a separate program, HTML content should often be used in place of or in addition to the PDF document.

The Algorithm...In English

A link to a .pdf file is present.
